	blocks QD-42 Profile: view, add and clear my book ...		To Do
Rank:	0|i000n3:		
Sprint:			

Description

Steps to reproduce:

1. Log in to https://demoqa.com/login with a valid user
2. Click "Profile" in the header
3. Observe the "Book" table on https://demoqa.com/profile

Actual result

- There is no button, link or control on the Profile page that allows the user to add a book to their collection directly from that page.
- The "Go To Book Store" button navigates, but there is no "Add" action on Profile itself.

Expected result

- The Profile page should provide a way to add a book directly (e.g. an "Add Book" button or inline search field).
- Or, at least, a clear call-to-action explaining how the user can return to Book Store and add books.

Environment

- http://demoqa.com Profile module
- Chrome / Windows 10

Description

As a new user
I want to fill out and submit the registration form
So that I can create my own account and see my book collection

Acceptance criteria:

Scenario: I want to click on the register button and be redirected
Given I am on the profile section https://demoqa.com/profile
When I click on the "register" link
Then I want to be redirected to the registration form

Scenario: Successful registration with valid data
Given I want to register on the register page https://demoqa.com/register
When I fill out all the form fields with valid data

And I click on the "Register" button
Then I want to be able to access my account

Scenario: Registration fails when Last Name (or required field) is empty
Given I am on the register page https://demoqa.com/register
When I fill in all required fields with valid data except Last Name
And I click the "Register" button
Then the Last Name field is highlighted in red
And I see the inline error message "This field is required."

Description

As a user
I want to view my book collection on the Profile page and clear it
So that I can confirm my saved books are listed and I can delete them all at once

Acceptance Criteria

Scenario: View saved books in profile
Given I am logged in and on https://demoqa.com/profile
When I look at the "My Book" table
Then I see each book I added (e.g "Git Pocket Guide") listed with Title, Author and Action columns

Scenario: Clear all books from my collection
Given that at least one book exists in my collection
When I click "Delete All Books"
And I accept the confirmation dialog
Then the table shows "No rows found"
And I see a success notification "All Books deleted"

Scenario: Add a book to my collection and view it on Profile
Given I am logged in and on https://demoqa.com/profile
When I click the "Go To Book Store" button
And I search for "Git Pocket Guide" in the Book Store
And I click on the book to add it to the profile table
And I click the "Profile" link
Then the "My Book" table lists a row with Title = "Git Pocket Guide"

Description

As a user
I want to verify dynamic UI behaviors that occur after a delay
So that I can ensure timing-based and style-based changes work correctly

Acceptance Criteria

Scenario: "Will enable 5 seconds" button is disabled by default and becomes enabled after 5s
Given I am on https://demoqa.com/dynamic-properties
Then the "Will enable 5 seconds" button is disabled
When I wait for 5 seconds
Then the "Will enable 5 seconds" button is enabled

Scenario: "Visible After 5 Seconds" button appears after a delay
Given I am on https://demoqa.com/dynamic-properties

Then the "Visible After 5 Seconds" button is not visible
When I wait for 5 seconds
Then the "Visible After 5 Seconds" button becomes visible

Scenario: "Color Change" button changes color after a delay
Given I am on https://demoqa.com/dynamic-properties
When I capture the initial color of the "Color Change" button
And I wait for 5 seconds
Then the color of the "Color Change" button is different from the initial color
